

Patient Engagement and Management Platform

PatientX360 is a tailored Medical Management, Clinical Trial and Patient Continuity of Care application for understanding patient expectations and experiences throughout their healthcare journey.

Providing a 360° view of patients at every stage of their care by using Artificial Intelligence and Machine Learning (AI/ML).

PatientX360 is designed to be highly flexible and easily configurable to best fit the wide variety of settings in healthcare. This way, you get the data you need to address your business challenges.

- Health Insurance Payers
- Medical Device Manufacturers
- Pharmaceutical Companies & Contract Research Organizations
- Providers (Hospitals, Group Practices, Accountable Care Organizations, Integrated Delivery Networks, etc.)

Stay on top of real-time data, with our live data feeds and dashboards

- Integrate data from all sources: wearable devices, EHRs, and CRMs
- Drill down from graphical data summaries to individual patient level
- Create personalized dashboard views for different user levels
- Powerful data visualizations, such as geo-representation
